

Shropshire Woodcock survey summary for 2003 and 2013

Tom Wall to John Tucker in 2015. Data from BTO.

TW notes:

I don't understand why some entries are highlighted in red and others in green.

Dot indicates that no count took place.

A zero that there was a count and none was seen.

My understanding is that unbracketed figures refer to the number of roding passes recorded

and bracketed figures refer to the estimated number of males present.
